

Letter of Recommendation

10 March 2023

To whom it may concern,

It is my pleasure to recommend Chua Chen Yi for a position with your organisation. He has been with us since October 2021, assisting with the integration of various kinds of electronics and sensors into our portfolio of products, with the purpose of making them human interactive. These range from small objects, such as a simple static prop, to larger machinery, such as smoke machines.

He is responsible for designing, sourcing, prototyping and integrating all of the electronics into a finished product. In the several months he has been here, he has successfully completed a number of projects for us. This includes wireless and motion-activated servos to operate machinery; photo-taking booths using computer vision; and battery conversion of wall-powered props.

In addition to these projects, he has also assisted in the upkeep of our online store. He has written several Python programs which automate the task of updating inventory, pricing, and product descriptions in a fraction of the time, saving hours of potential repetitive work.

Chen Yi has proven himself to be capable and earnest in his work. He isn't afraid to voice out concerns, and is resourceful in his solutions to our difficulties and challenges. We are glad to have him with us, and we have full confidence in his ability to succeed in any role he undertakes.

Sincerely,

Patrick Ng
Founder
